

SHIVANSH SINGH

+91 9911405469 • shxvansh@gmail.com • linkedin.com/in/shxvansh

Analytical AI/ML Engineer specializing in Artificial Intelligence with hands-on experience building and deploying end-to-end products from research to production. Well-versed in Python, TensorFlow, Automation and NLP, with a strong aptitude for solving complex problems. Ready to deliver impactful solutions using deep learning and computer vision.

WORK EXPERIENCE

RegisterKaro **05/2025 – Present**
AI/ML Engineer **Gurgaon**

- Designed, built, and deployed an end-to-end automation product; developed a **FastAPI** (RestAPI) for model serving and managed production deployment on **AWS EC2**.
- Architected and implemented an NLP-based sentiment analysis engine using **Hugging Face Transformers** to analyze scraped data and deliver key business insights.
- Integrated **computer vision** capabilities using **OCR** technologies to automate data extraction from image-based formats, improving the efficiency of data collection pipelines.
- Managed the entire project lifecycle for automation products, from ideation and API design to front-end development and production deployment.

AI/ML Intern **Gurgaon, India**

- Developed Python scripts to automate data collection, utilizing **computer vision** and **OCR** to process image-based verifications in form-filling workflows.
- Assisted in building end-to-end automation products, supporting the integration of **RestAPIs** and front-end components.

Maruti Suzuki India Limited **02/2025 – 05/2025**
Intern **Vasant Kunj, New Delhi, Delhi**

- Designed and implemented a manpower scoring system by building and comparing classification models (e.g., Random Forest, XGBoost, **Neural Networks**) using **Scikit-Learn** and **TensorFlow**.
- Executed end-to-end data preprocessing, including cleaning missing/redundant data and applying **feature engineering** techniques to enhance model accuracy.

SKILLS

Programming Languages: Python

AI/ML Frameworks & Libraries: Hugging Face, OpenCV, Scikit-Learn, TensorFlow

AI/ML Concepts & Techniques: Computer Vision, Data Analysis, Feature Engineering, Generative AI, Machine Learning, Natural Language Processing (NLP), Neural Networks

Tools & Platforms: EC2(AWS), FastAPI, Git, MySQL, NoSQL, Selenium

EDUCATION

Bachelor in Technology, Information Technology

Maharaja Agrasen Institute Of Technology • GPA: 8.1 CGPA

New Delhi, India • 05/2025

- Specialization in Artificial Intelligence and Machine Learning.
