

SHIVANSH SINGH
AI/ML Engineer & Full-Stack Developer

CONTACT INFORMATION

Phone: (555) 123-4567
Email: shivansh.singh@email.com
LinkedIn: linkedin.com/in/shivanshsingh
Location: San Francisco, CA

PROFESSIONAL SUMMARY

Experienced AI/ML Engineer with 4+ years of expertise in developing scalable machine learning systems, natural language processing, and full-stack web applications. Proven track record in deploying production-ready AI solutions, optimizing model performance, and leading cross-functional teams. Strong background in Python, TensorFlow, PyTorch, and cloud platforms (AWS, GCP).

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, R
Machine Learning: TensorFlow, PyTorch, Scikit-learn, XGBoost, Hugging Face Transformers
Web Technologies: React, Node.js, FastAPI, Flask, GraphQL, REST APIs
Cloud Platforms: AWS (SageMaker, Lambda, EC2), Google Cloud (Vertex AI, BigQuery), Azure
Databases: PostgreSQL, MongoDB, Redis, Elasticsearch
DevOps & Tools: Docker, Kubernetes, Git, CI/CD, MLflow, Weights & Biases
Data Processing: Apache Spark, Pandas, NumPy, Apache Airflow

PROFESSIONAL EXPERIENCE

Senior AI/ML Engineer
TechCorp Inc., San Francisco, CA
January 2022 - Present

- Designed and implemented end-to-end machine learning pipelines for customer churn prediction, achieving 15% improvement in model accuracy and \$2M annual savings
- Led development of NLP-based document analysis system using BERT transformers, processing 10,000+ documents daily with 94% accuracy
- Built and deployed RAG (Retrieval-Augmented Generation) systems for intelligent document Q&A, reducing response time by 60%
- Architected scalable ML infrastructure on AWS, handling 1M+ predictions per day with 99.9% uptime
- Mentored junior engineers and established ML best practices, improving team productivity by 25%
- Collaborated with product teams to integrate ML models into production applications

AI/ML Engineer
DataTech Solutions, Palo Alto, CA
June 2020 - December 2021

- Developed computer vision models for automated quality inspection, achieving 96% detection accuracy
- Implemented recommendation systems using collaborative filtering and deep learning approaches
- Created automated data pipelines using Apache Airflow, reducing manual processing time by 80%
- Built RESTful APIs for ML model serving using FastAPI and Docker containers
- Conducted A/B testing and model validation experiments, improving user engagement by 20%

Software Engineer Intern
StartupXYZ, Mountain View, CA

Summer 2019

- Developed full-stack web application using React and Node.js for internal dashboard
- Implemented data visualization components using D3.js and Chart.js
- Worked with SQL databases and optimized query performance for reporting features
- Participated in agile development process and code reviews

EDUCATION

Master of Science in Computer Science
Stanford University, Stanford, CA
September 2018 - June 2020

- GPA: 3.8/4.0
- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Distributed Systems
- Research Assistant: Computer Vision Lab - Developed object detection algorithms using YOLO

Bachelor of Technology in Computer Science
Indian Institute of Technology, Delhi, India
August 2014 - May 2018

- GPA: 9.2/10.0 (First Class with Honors)
- President of Computer Science Society
- Final Year Project: "Smart Traffic Management System using IoT and ML"

PROJECTS

AI-Powered Resume Optimizer (Personal Project)

- Built intelligent resume tailoring system using RAG and fine-tuned LLMs
- Implemented semantic search for job-resume matching with 85% accuracy
- Created web interface using Streamlit for user-friendly experience
- Technologies: Python, LangChain, ChromaDB, Hugging Face, Streamlit

Real-time Sentiment Analysis Platform

- Developed streaming sentiment analysis system processing 1000+ tweets per minute
- Used LSTM and Transformer models for emotion classification
- Deployed on Kubernetes with auto-scaling capabilities
- Technologies: Python, TensorFlow, Kafka, Kubernetes, Docker

Smart Inventory Management System

- Built IoT-based inventory tracking system for retail warehouses
- Implemented computer vision for object detection and counting
- Created real-time dashboard with predictive analytics
- Technologies: Python, OpenCV, Raspberry Pi, Firebase, React

CERTIFICATIONS

- AWS Certified Machine Learning - Specialty (2023)
- Google Cloud Professional Cloud Architect (2022)
- TensorFlow Developer Certificate (2021)
- Deep Learning Specialization - Coursera (2020)
