

Senior Data Scientist - Analytics & ML

About the Company:

DataTech Solutions is a leading analytics company specializing in customer behavior analysis and predictive modeling for Fortune 500 companies.

Job Description:

We're looking for a Senior Data Scientist to lead advanced analytics projects and develop sophisticated machine learning models. You'll work on high-impact projects that drive business decisions and create data-driven solutions.

Key Responsibilities:

- Lead development of predictive models for customer behavior and churn analysis
- Design and implement A/B testing frameworks and statistical analysis
- Build recommendation systems using collaborative filtering and deep learning
- Create automated data pipelines and ETL processes using Apache Airflow
- Develop interactive dashboards and data visualizations for executive reporting
- Conduct statistical analysis and hypothesis testing for business decisions
- Collaborate with engineering teams to deploy models into production

Technical Requirements:

- PhD or Master's degree in Statistics, Mathematics, Computer Science, or related field
- 5+ years of experience in data science and statistical modeling
- Expert knowledge of Python, R, and statistical programming
- Strong background in machine learning algorithms and techniques
- Experience with SQL and big data technologies (Spark, Hadoop)
- Proficiency in data visualization tools (Tableau, Power BI, matplotlib, seaborn)
- Experience with experiment design and A/B testing methodologies
- Knowledge of cloud data platforms (BigQuery, Redshift, Snowflake)

Required Skills:

- Advanced statistical analysis and modeling
- Machine learning model development and validation
- Data pipeline engineering and automation
- Business intelligence and dashboard creation
- Experimental design and causal inference
- Stakeholder communication and presentation skills

Nice to Have:

- Experience with deep learning frameworks
- Background in economics or behavioral science
- Publications in data science or statistics
- Experience with real-time analytics

Benefits:

- Competitive compensation package
- Comprehensive health benefits
- Professional development opportunities
- Flexible working hours
- Collaborative team environment

Location: Palo Alto, CA (On-site preferred)
