

Senior Frontend Developer - React & TypeScript

About the Company:

WebFlow is a modern web development agency specializing in user-centric digital experiences and responsive web applications.

Job Description:

We are seeking a Senior Frontend Developer to create exceptional user experiences and build scalable frontend architectures. You'll work on cutting-edge web applications using modern JavaScript frameworks and tools.

Key Responsibilities:

- Develop responsive web applications using React and TypeScript
- Build reusable component libraries and design systems
- Optimize application performance and user experience
- Collaborate with UX/UI designers to implement pixel-perfect designs
- Integrate with RESTful APIs and GraphQL endpoints
- Implement automated testing and CI/CD pipelines
- Mentor junior developers and contribute to code quality standards
- Participate in architectural decisions and technology evaluations

Technical Requirements:

- 5+ years of experience in frontend development
- Expert proficiency in React, TypeScript, and modern JavaScript (ES6+)
- Strong experience with HTML5, CSS3, and responsive design
- Experience with state management (Redux, Zustand, or similar)
- Knowledge of testing frameworks (Jest, React Testing Library, Cypress)
- Familiarity with build tools (Webpack, Vite, Babel)
- Experience with version control (Git) and collaborative development
- Understanding of web performance optimization and accessibility

Required Skills:

- Component-based architecture and design patterns
- Cross-browser compatibility and responsive design
- API integration and data fetching patterns
- Performance optimization and debugging
- Code review and quality assurance
- Agile development methodologies

Nice to Have:

- Experience with Next.js or similar React frameworks
- Background in backend development (Node.js, Python)
- Knowledge of mobile development (React Native)
- Contributions to open-source frontend projects
- Experience with design tools (Figma, Sketch)

Benefits:

- Competitive salary and equity
- Comprehensive health insurance
- Remote work flexibility
- Professional development budget
- Modern tech stack and tools
- Collaborative and inclusive culture

Location: Remote (US-based)
